View data in PostGreSQL

1. Download and install PostGreSQL from the link https://www.postgresql.org/download/
2. Get the database credentials from Heroku website.
3. Set the PostGreSQL bin path to the Environmental variables
4. *In the command line prompt,* `set DATABASE_URL`=*replaceThisWithUrlInDatabaseCredentials*
5. For PostGreSQL use the command `heroku pg:psql`
6. To view tables in the database
```
SELECT * FROM
pg_catalog.pg_tables
WHERE
schemaname != 'pg_catalog'
AND schemaname != 'information_schema';
```
